Year	Number of people (millions)
2015	~1.2
2025	~2.8

- **Prevalence** – the proportion of people in a population who have a disease or condition at a specific point in time
- **Incidence** – the number of new cases of a disease or condition that occur in a population over a specific period of time
- **Mortality** – the number of deaths resulting from a disease or condition
- **Morbidity** – the state of being diseased or unhealthy
- **Quality of Life (QoL)** – a measure of an individual's overall well-being, including physical, mental, and social aspects
- **Healthcare Costs** – the expenses associated with the diagnosis, treatment, and management of a disease or condition
- **Healthcare Access** – the availability and accessibility of healthcare services to a population
- **Healthcare Equity** – the fair and just distribution of healthcare resources and services across different populations
- **Healthcare Sustainability** – the ability to maintain and improve healthcare services over the long term
- **Healthcare Innovation** – the development and implementation of new technologies, treatments, and services to improve healthcare outcomes
- **Healthcare Policy** – the set of rules and regulations that govern the healthcare system
- **Healthcare Regulation** – the process of monitoring and controlling healthcare services to ensure quality and safety
- **Healthcare Research** – the systematic investigation of healthcare issues to generate new knowledge and improve healthcare outcomes
- **Healthcare Education** – the process of providing healthcare professionals with the knowledge and skills needed to deliver high-quality care
- **Healthcare Training** – the process of providing healthcare professionals with the practical experience needed to deliver high-quality care
- **Healthcare Accreditation** – the process of evaluating healthcare services against a set of standards to ensure quality and safety
- **Healthcare Certification** – the process of recognizing healthcare professionals as experts in their field
- **Healthcare Licensure** – the process of granting healthcare professionals the legal right to practice their profession
- **Healthcare Malpractice** – the failure of a healthcare professional to provide the standard of care, resulting in harm to a patient
- **Healthcare Litigation** – the legal process of resolving healthcare malpractice claims
- **Healthcare Reform** – the process of making changes to the healthcare system to improve its performance
- **Healthcare Transformation** – the process of fundamentally changing the healthcare system to improve its performance
- **Healthcare Disruption** – the process of challenging the status quo of the healthcare system to create new opportunities for improvement
- **Healthcare Innovation Ecosystem** – the network of organizations and individuals that work together to develop and implement healthcare innovations
- **Healthcare Policy Ecosystem** – the network of organizations and individuals that work together to develop and implement healthcare policies
- **Healthcare Regulation Ecosystem** – the network of organizations and individuals that work together to monitor and control healthcare services
- **Healthcare Research Ecosystem** – the network of organizations and individuals that work together to generate new knowledge and improve healthcare outcomes
- **Healthcare Education Ecosystem** – the network of organizations and individuals that work together to provide healthcare professionals with the knowledge and skills needed to deliver high-quality care
- **Healthcare Training Ecosystem** – the network of organizations and individuals that work together to provide healthcare professionals with the practical experience needed to deliver high-quality care
- **Healthcare Accreditation Ecosystem** – the network of organizations and individuals that work together to evaluate healthcare services against a set of standards
- **Healthcare Certification Ecosystem** – the network of organizations and individuals that work together to recognize healthcare professionals as experts in their field
- **Healthcare Licensure Ecosystem** – the network of organizations and individuals that work together to grant healthcare professionals the legal right to practice their profession
- **Healthcare Malpractice Ecosystem** – the network of organizations and individuals that work together to resolve healthcare malpractice claims
- **Healthcare Litigation Ecosystem** – the network of organizations and individuals that work together to resolve healthcare malpractice claims
- **Healthcare Reform Ecosystem** – the network of organizations and individuals that work together to make changes to the healthcare system
- **Healthcare Transformation Ecosystem** – the network of organizations and individuals that work together to fundamentally change the healthcare system
- **Healthcare Disruption Ecosystem** – the network of organizations and individuals that work together to challenge the status quo of the healthcare system
- **Healthcare Innovation Ecosystem** – the network of organizations and individuals that work together to develop and implement healthcare innovations
- **Healthcare Policy Ecosystem** – the network of organizations and individuals that work together to develop and implement healthcare policies
- **Healthcare Regulation Ecosystem** – the network of organizations and individuals that work together to monitor and control healthcare services
- **Healthcare Research Ecosystem** – the network of organizations and individuals that work together to generate new knowledge and improve healthcare outcomes
- **Healthcare Education Ecosystem** – the network of organizations and individuals that work together to provide healthcare professionals with the knowledge and skills needed to deliver high-quality care
- **Healthcare Training Ecosystem** – the network of organizations and individuals that work together to provide healthcare professionals with the practical experience needed to deliver high-quality care
- **Healthcare Accreditation Ecosystem** – the network of organizations and individuals that work together to evaluate healthcare services against a set of standards
- **Healthcare Certification Ecosystem** – the network of organizations and individuals that work together to recognize healthcare professionals as experts in their field
- **Healthcare Licensure Ecosystem** – the network of organizations and individuals that work together to grant healthcare professionals the legal right to practice their profession
- **Healthcare Malpractice Ecosystem** – the network of organizations and individuals that work together to resolve healthcare malpractice claims
- **Healthcare Litigation Ecosystem** – the network of organizations and individuals that work together to resolve healthcare malpractice claims
